4. DESCRIPTION OF DISTRICT

The San Mateo County Harbor District was established, in 1933, by a Resolution of the Board of Supervisors, who established the entire area of the County of San Mateo as the District's boundaries.

The Army Corps of Engineers began work on a breakwater at Pillar Point for a harbor of refuge for the fishing fleet after World War II and finally completed it in 1961. The Johnson Pier, docks, and the inner breakwater were built during the 1970's and 1980's. Pillar Point Harbor remains a major commercial fishing, sport fishing and recreational harbor on California's central coast and is host to many public events.

The District is governed by a five-member Board of Harbor Commissioners, who are elected for staggered four-year terms.

5. BACKGROUND

Pillar Point Harbor (PPH) has an active commercial fishing fleet, three docks for recreational vessels and ample visiting vessel moorings/anchorage space. In addition, PPH has public beaches, coastal trails and a retail center which the District leases to marine related businesses and restaurants. Pillar Point Harbor's launch ramp is the only one with direct ocean access for over 30 miles. Therefore, local parking has very high demand. Overflow parking often is pushed to alongside Hwy 1, creating a challenging/dangerous situation.

Proposer may not designate its entire Proposal as confidential. Additionally, Proposer may not designate Proposal Forms as confidential.

Burnham Strip Overflow Parking Lot Project

(Supporting Improved Recreational Access to the San Mateo Coast)

Project Scope Summary: Design a public parking lot with an adjacent greenspace area within the specified land parcels in the village of El Granada, California 94018, between Highway 1 and Avenue Alhambra, commonly referred to as the Burnham Strip. Including all design, engineering, public outreach, all necessary project permitting, traffic study to determine crosswalk access across HWY 1 feasibility, study to determine potential impact to local wildlife (if any), construction bid support, construction management and construction grant application assistance.

Background: Multiple times per year (Crab Opener, Salmon Opener, Holidays, nice weather weekends, special events), the parking capacity of Pillar Point Harbor is exceeded. On these occasions, the shoulder of Hwy 1 is used as an unofficial overflow parking area. This is an unsafe practice. In addition to the safety concerns of parking on the Hwy shoulder, a current project being sponsored by Caltrans to resurface Hwy 1 will redesignate the highway shoulders as “bicycle lanes”, eliminating the ability to use the shoulders as overflow parking. The District recently purchased properties (APN 047-251-040, 047-251-140) located on the northern end of the Burnham Strip between Hwy 1 and Avenue Alhambra (near Capistrano Rd) in El Granada which, along with County and privately owned parcels, will serve as the area for this overflow parking lot and greenspace project. (See Figure 1).

Burnham Strip Overflow Parking Lot Project

(Supporting Improved Recreational Access to the San Mateo Coast)

The scope is broken down below into tasks and deliverables:

- 1) Evaluate current site conditions, including an evaluation study of already available area parking/ADA parking and current/future estimated demand. Develop an initial parking lot and greenspace design in the designated area for District review, maximizing parking spaces.
- 2) Once the preliminary design has been agreed upon by District, organize, notice and facilitate an initial public workshop/meeting to gain public/stakeholder input, design alternatives. This preliminary design will include number of determined parking spaces/ADA parking spaces, proposed crosswalk location, greenspace area, recommended native landscaping islands, safe lighting consistent with Dark Sky International recommendations and use of porous asphalt, or other high use capable parking lot surface, as no more than 10% of a parcel can be impervious material. Make clear to the public that as the project progresses a traffic and wildlife study will be conducted.
- 3) Submit initial design plans to all permitting agencies for discussion/feedback, determine feasibility, report findings to District for necessary plan modification input.
- 4) Conduct traffic and wildlife studies to aid in any required permitting design/engineering changes. Ensure design is consistent with Caltrans Project Development Procedures Manual (PDPM) & Caltrans Highway Design Manual (HDM), Green Stormwater Infrastructure (GSI) and Leadership and Environmental Design (LEED) fundamentals.
- 5) Once a preferred design alternative is determined, facilitate a second public meeting to request public/stakeholder input, provide project update and explain efforts that led to current design.
- 6) Create detailed technical specifications and identify, prepare applications for, and obtain, all necessary permits for construction, including, but not limited to; Coastal Development Permit, any required San Mateo County Building/Plumbing/Electrical/Sewage permits, CEQA (Neg Dec or Cat Ex), Caltrans Encroachment Permit, all required permitting for construction.
(Some permitting may be time sensitive and have to wait until project funding has been secured.)
- 7) Complete Invitation for Bid (IFB) documents, using District template.
- 8) Assist District through IFB process, advertise to potential contractors, respond to bidder questions/clarifications/requests for modifications.
- 9) Construction management/support, respond to contractor RFI's, prepare submittals and any required ASI's/Change Orders.
- 10) Conduct bi-monthly site visits to ensure construction contractor is building to spec, acting in accordance with environmental and safety standards.
